DEVREL ENGINEER, TEL-AVIV

On-site, Migdal Hashachar (near Rakevet Merkaz).

To apply for this position, please send your CV to tlv-hiring@ariga.io

About Us

At Ariga, we empower developers to manage database schemas as code, enabling efficient and reliable database changes. Our product, Atlas, is trusted by developers and teams worldwide, and we're looking for a **DevRel Engineer** to help our users succeed. This is an exciting opportunity for someone passionate about continually learning, building relationships with a technical audience, and improving the developer experience.

About the Role

We're seeking a Developer Relations Engineer to foster meaningful relationships between our company, our customers, and our community of users. You'll act as a trusted advisor, providing guidance, solving complex problems, and gathering feedback to inspire new features and improvements.

What You'll Do:

- **Create Content:** Produce technical resources like tutorials, guides, and demos in written and video formats to make our tools accessible and impactful.
- **Connect with Developers**: Understand our users' and customers' challenges, communicating their needs to internal teams to inform product development.
- **Provide Expert Support**: Guide developers in implementing and using our tools effectively, ensuring they succeed in their technical goals.
- **Create Value**: Help teams discover new ways our tools can solve their challenges, driving deeper adoption and success.

Requirements

- A degree in computer science or a related field.
- 2-3+ years of hands-on experience in software development or developer relations.
- Excellent written and verbal English skills.
- Strong public speaking skills.
- Ability to create engaging and informative content for a technical audience.
- Strong interpersonal and organizational skills, with a proactive, solution-focused mindset.

What We're Looking For

- A curious and motivated individual who thrives on helping others succeed.
- Eagerness to learn and grow in areas like DevOps, AI tooling, and database management.
- A team player who can manage multiple responsibilities, work independently, and collaborate well in a fast-paced environment.

How to Apply

If you're passionate about coding, community, and making an impact, we'd love to hear from you. Please send your resume and a brief note about why you're excited about this role to tlv-hiring@ariga.io
