

## **DEVREL ENGINEER FOR ARIGA (TEL-AVIV, HAMBURG OR REMOTE)**

We are looking for a DevRel Software Engineer to join our team.

The company is in a post-series A stage, funded by some of the top VC firms in the world.

Ariga is leading two successful open-source communities ([Ent](#) and [Atlas](#)) and building a commercial platform on top of them.

This role is great for you if:

- You love Go and want to work on world-class open-source software.
- You love coding and want to help other developers be awesome at their job.
- You want an opportunity to build your personal brand by working on popular open-source projects, publishing technical blogs, and speaking at conferences.
- You want to develop deep industry expertise in the domain of databases and cloud technologies.
- You want to join an early-stage company with a very strong trajectory.

As a DevRel Engineer in the company, you will:

- Support and engage with our open-source communities to keep them highly technical, innovative, welcoming, and helpful.
- Produce technical content (blogs, videos, podcasts, etc.) to help promote our projects and products.
- Represent the company in conferences, community events, and meetups.
- Support community members in getting involved, and contributing to the project and the community.

### Requirements

- 3+ years of experience as a Software Engineer.
- Experience programming in Go.
- Proven track record of creating great (and fun) content about technical topics (talks, text, audio, or video).
- Experience in participating in an open-source or technical community.

### Advantages

- Academic background in Computer Science or Software Engineering.

If you are interested in this position, please send your CV to [hello@ariga.io](mailto:hello@ariga.io).
