DEVREL ENGINEER (Junior), TEL-AVIV

On-site, Migdal Hashachar (near Rakevet Merkaz).

To apply for this position, please send your CV to hello@ariga.io

About Us

At Ariga, we empower developers to manage database schemas as code, enabling efficient and reliable database changes. Our product, Atlas, is trusted by developers and teams worldwide. We're looking for a **DevRel Engineer** to help our users succeed and grow their accounts. This is an exciting opportunity for someone early in their career, eager to learn, and passionate about building relationships with a technical audience.

Role Overview

As a DevRel Engineer, you will play a pivotal role in connecting with our community of users, supporting them in their technical journey, and fostering meaningful relationships with the company. You'll act as a trusted advisor, helping developers integrate our tools, solve complex problems, and unlock new opportunities with our product.

In addition to empowering users, you will collaborate with existing customers to ensure they fully leverage the value of our solutions. By understanding their needs and challenges, you'll help identify ways our tools can address broader use cases and drive deeper engagement within their teams.

In this role, you will:

- **Be the Advocate**: Understand our users' and customers' challenges, communicating their needs to internal teams to inform product development.
- **Provide Expert Support**: Guide developers in integrating and using our tools effectively, ensuring they succeed in their technical goals.
- **Foster Strong Relationships**: Build trust and rapport with users and customers through responsive, solutions-oriented engagement.
- **Create Value**: Help teams discover new ways our tools can solve their challenges, driving deeper adoption and success.
- **Empower Developers**: Develop resources like tutorials, guides, and demos to make our tools accessible and impactful.

Requirements

- Exceptional English skills, both written and verbal, with the ability to communicate complex ideas clearly and effectively.

- A degree in Computer Science, Software Engineering, or a related field, or 1–2 years of hands-on experience in software engineering.
- Eagerness to learn and grow in areas like DevOps, developer tools, and database schema management.
- Strong interpersonal and organizational skills, with a proactive, solution-focused mindset.
- Ability to manage multiple responsibilities, work independently, and collaborate effectively in a fast-paced environment.

What We're Looking For

- A curious and motivated individual who thrives on helping others succeed.
- Someone excited to dive into technical topics and learn on the job.
- A team player who can take initiative and own their role in building a great user experience.

Why Join Us?

- A unique opportunity to kickstart your career in a high-impact role.
- Learn from a team of experienced engineers and grow your technical and soft skills.
- Be part of a company where your contributions directly impact the developer experience.

How to Apply

If you're passionate about coding, community, and making an impact, we'd love to hear from you. Please send your resume and a brief note about why you're excited about this role to hello@ariga.io
